

NSSGA: THE VALUE OF MEMBERSHIP SMALL PRODUCERS

Ensuring small producers have the support they need and the voice they deserve

The National Stone, Sand & Gravel Association (NSSGA) is the federal leader in advocating for priorities in the aggregates industry. Burdensome and unnecessary federal regulations and legislation can be costly, especially for small producers. While most large producers may have teams to deal with these issues, small producers often do not. NSSGA offers a variety of small producer member benefits, including:

- Environmental, health and safety experts available
- Access to other producer members nationwide
- Involvement in our committees, including the Small Producer Subcommittee and Membership Committee
- Timely webinars to inform and educate your teams on the latest

“When I recently needed guidance on a regulatory issue that I was never faced with before, I turned to my friends at the NSSGA...and it was a very wise decision.”

Karen Hubacz
