

ALL IN *for* SAFETY!

Safety is an attitude.
What's yours?

*See something,
say something.*

*Always report unsafe conditions
as soon as possible.*

**ALWAYS MAINTAIN
3 POINTS OF CONTACT**

*(two hands and a foot, or two feet and a hand)
when ascending or descending equipment,
ladders or rolling stock steps.*

**SAFETY STARTS
WITH TRAINING.**

**Always use the right tool for the job.
Never take shortcuts.**

DON'T RUSH.

*Take time to consider the safest way
to do a task before you begin.*

**Good housekeeping
IS ESSENTIAL.**

*The little things make a big difference
in preventing slips, trips and falls.*
