

*"A World Leader in Customized Dredging Solutions"*

**FOR IMMEDIATE RELEASE**

**Senator Bill Cassidy, M.D. Visits DSC Dredge, Engages with Employees and Leadership on Industry Innovation, Challenges and More**

**RESERVE, LOUISIANA** – Last week Wednesday, U.S. Senator Bill Cassidy, M.D., visited DSC Dredge (DSC) to tour its manufacturing facility, engage in discussions with employees, and participate in a roundtable with the company employees. The visit highlighted DSC's leading [innovations](#), its commitment to manufacturing excellence, and the challenges facing the dredging and infrastructure sectors.

During the visit, Senator Cassidy met with DSC's co-owners, Bob and Bill Wetta, to discuss critical matters impacting the industry. The conversation covered key topics, DSC's approach to counteracting challenges through cutting-edge innovation and customer-focused solutions and what sets DSC apart from competitors.

"Innovation is at the core of what we do," said Bill Wetta to which Bob added "at DSC, we listen; we educate those who come to us, and in turn, they educate us on their projects. This collaborative approach allows us to manufacture solutions that directly address the unique needs of our customers. Most people think they can just buy a dredge off the shelf and it's going to do the job – that's not how it works." He added, "we are not just looking for another sale, we build [relationships](#) and partner with our clients for mutual success".

A major highlight of the discussion surrounded DSC's groundbreaking advancements, which included [DSC Vision](#); and the [Muddy Water](#) dredge, with its revolutionary design and system. The Wetta's detailed how this dredge is specifically designed to optimize efficiency, reduce environmental impact, and increase productivity for customers in a way no other dredge does.

**Bill Wetta Discusses Innovation and Technology with Senator Cassidy**

Following the discussions, Senator Cassidy commended DSC Dredge for its forward-thinking approach and impact on both local and global dredging operations.

“DSC Dredge is an incredibly innovative company based in Louisiana whose dredges are being used from the LSU Lakes to Bangladesh. And they beat the competition,” said Senator Cassidy. “What DSC is building is value-add, not a commodity.”

As part of Senator Cassidy visit he took the opportunity to meet directly with DSC employees, offering them a platform to ask questions and engage in meaningful discussions about the current state of affairs - industry related and other. At the end of the roundtable, employees appreciated the Senator’s openness, as he shared his perspectives and addressed issues that are not typically discussed in such an accessible and candid forum.

Engaging Roundtable Discussions with Senator Cassidy

“Our team takes great pride in designing and building dredges that keep America’s waterways open, provide critical infrastructure materials, and perform environmental restoration and mitigation services, we appreciate Senator Cassidy’s commitment to supporting industries like DSC. We are grateful for the time he took to engage directly with our team and hear their perspectives firsthand,” stated Bob and Bill Wetta.

DSC Dredge remains dedicated to pushing the boundaries of dredging technology and ensuring that its solutions continue to meet the evolving needs of the industry.
