FOR IMMEDIATE RELEASE

TruckPay Secures Sixth Patent for MyTruckScales

New patent extends company's leadership in autonomous and semi-autonomous truck scale management

Tenaflly, New Jersey – June 13, 2025–

TruckPay is proud to announce that it has been granted its sixth patent on its best-in-class, NTEP-certified mobile and cloud-based scale management product: MyTruckScales.

“I’m super-proud of the entire TruckPay team, as we continue to be the innovation leader in truck scale management,” said Barry Honig, TruckPay’s CEO & President. “This patent further strengthens our intellectual property ownership and our leadership in the weighing of autonomous and semi-autonomous trucks.”

Honig added that, with the growing prevalence of fleets of autonomous and semi-autonomous vehicles in freight, aggregates, waste, and recycling, the need to weigh such vehicles at truck scales will rapidly grow over the next few years. “MyTruckScales is the only truck scale management system that can both weigh autonomous vehicles and enable them to interact with a point-of-sale (POS) system. This means an autonomous vehicle could enter a transfer station, landfill, MRF, or quarry, drop off or pick up a load of material, and pay for it—without any human intervention.”

To learn more about MyTruckScales or to schedule a demo, please visit mytruckscales.com or call 866-901-7884.

###

About MyTruckScales

MyTruckScales is TruckPay’s patented, NTEP-certified mobile and cloud-based scale management and POS platform, built to modernize scale operations across waste, recycling, construction, and bulk materials industries. It replaces paper tickets, kiosks, and manual workflows with real-time, wireless weighments and fully digital transactions—supporting both human-operated and autonomous vehicles.

The platform offers flexible pricing models, virtual kiosks, cash and digital payments, live inspections, and deep ERP integrations. Advanced reporting tools support LEED, RCI, and diversion tracking, while real-time portals provide transparency to all stakeholders. With six U.S. patents and growing adoption, MyTruckScales sets the new standard in scale and transaction management.
